ABSTRACT OF THE DISCLOSURE

METHOD FOR FUNCTIONAL MAPPING OF AN ALZHEIMER'S DISEASE
GENE NETWORK AND FOR IDENTIFYING THERAPEUTIC AGENTS FOR
THE TREATMENT OF ALZHEIMER'S DISEASE

5   The present invention provides a novel genetic
method for mapping a network of functional gene
interactions relating to Alzheimer's disease. Further
provided by the invention is a screening method for
identifying therapeutic agents for treating Alzheimer's
10 disease.
